

Casualty & Collision Reduction at Camera Sites  
as at 31 Mar 2009

The performance of camera sites in Staffordshire is based on the reduction in collisions and casualties since enforcement began.

The information below compares the average number of collisions or casualties in the three years before enforcement with the average number since. The higher the percentage, the better the site is performing.

Site Name	Length (km)	Fatal or Serious Injury		All Personal Injury	
		Casualty	Collision	Collision	Casualty
A34 Newcastle Rd, Stoke	3.26	73%	73%	46%	39%
